

COLLABORATIVE HEALTH NETWORK

an initiative of
nrhi Network for
Regional Healthcare Improvement

The debate about the need for healthcare transformation is over, and the time has come to act together on what is known, and learn together what can be done.

In pockets of innovation across the country, healthdoers have been forging local solutions to the U.S. health crisis, but to date, these regional efforts remain too disconnected, forcing too many people to start from scratch.

That's why with vision and support from the Robert Wood Johnson Foundation, the Network for Regional Healthcare Improvement (NRHI) launched the Collaborative Health Network—a new platform that connects healthdoers and trusted groups to accelerate health improvement.

Connect

Build powerful and trustworthy relationships with healthdoers, experts and allies—online and in-person

Learn

Explore topics prioritized by network participants and grounded in reality

Inspire

Energize health improvement efforts by sharing experiences, promoting local successes and recognizing rising stars

Accelerate

Catalyze the spread of what works so that no one has to start from scratch

What is it?

- Invited participants from trusted networks of communities and partners
- A shared-learning platform to connect with peers, learn, and access recommended resources
- Peer-to-peer online and in-person learning forums
- Participant-prioritized selection of healthcare and health topics
- Mentors comprised of local experts and national thought leaders

Who is the audience for the Network?

- Healthdoers who are actively working to accelerate local health improvement
- Community leaders and national experts who want to share their knowledge to make a difference
- Stakeholders and organizations who are supporting and enabling health improvement

Request an invitation to join today. The Collaborative Health Network is currently in an “invite-only” beta phase. Contact us and catalyze the spread of what works so that no one has to start from scratch. You can follow development of the Network at: **#healthdoer** or **www.nrhi.org/healthdoers**.

Join to change *every*
community at a time!

Regional Healthcare Improvement

How are we doing this?

The Collaborative Health Network connects healthdoers and catalyzes the spread of pioneering knowledge of what works across the U.S. so no one has to start from scratch.

Connect

- Easily find the right people, insight and resources on this by-invitation only shared learning platform
- Ask questions and get crowd-sourced answers from in-the-know participants
- Build new relationships with healthdoers from across the country through online and in-person events

Learn

- Gain insight and guidance from local experts, national thought leaders and rising stars
- Share and receive updates on relevant new programs, events and resources
- Join discussions facilitated by local leaders and experts on important health topics related to:
 - Payment and delivery system reform
 - Performance measurement and reporting
 - Quality improvement & practice transformation
 - Data analytics & health information technology
 - Collaborative leadership & social change

Inspire

- Share hard-won lessons and real-life stories about what works and what doesn't
- Receive support from seasoned local leaders who know what it takes to drive change
- Engage with like-minded peers in small groups

Accelerate

- Uncover pockets of local innovation in communities like yours
- Build bridges between disconnected projects, people and communities
- Tap into the collective wisdom of healthdoers across the country
