

HELPING PTNS ACCELERATE PRACTICES THROUGH THE FIVE PHASES OF TCPI: NRHI SAN LEARNING LAB

The NRHI SAN offers virtual Learning Labs for QI Advisors so your PTN can:

- Improve PAT milestone performance
- Access customized training based on your specific PTN's needs
- Share practice level performance stories
- Leverage best practice approaches and strategies from RHICs with decades of experience to share with providers

The Network for Regional Healthcare Improvement (NRHI) is a national organization of more than thirty member regional health improvement collaboratives (RHICs) and state partners across the United States. These multi-stakeholder organizations are working in their regions and collaborating across regions to transform the healthcare delivery system to improve the patient experience of care, including quality and satisfaction; improve the health of populations; and reduce the per-capita cost of healthcare.

A Learning Lab series is typically delivered over 4-6 months, is designed in collaboration with the PTN, and delivered by NRHI SAN Faculty. Current Learning Lab offerings include, but are not limited to:

- Quality Improvement concepts for PCP and Specialty Practices— Focusing in on specific Phase 2 milestones
- Training to improve the sharing of performance stories
- Risk Assessment foundational concepts, including Motivational Interviewing and Collaborative Communication
- Leveraging the practice team by using MAs at the top of their license
- Reducing Unnecessary Utilization strategies
- Implementing Behavioral Health Integration models
- Person and Family Engagement strategies

Interested in a Learning Lab series for your PTN?
