Note: Subject to Change!

Subgroup 4: Patient-reported Data

Month	Topic
Oct	Elements required for patient-reported data; patient experience, patient functional status, and shared decision making likely straw models
Nov	Review selected domains/measures; best sources of desired data elements; alternative approaches/technologies;
Dec	Best practices in working with entities and/or individuals that supply and receive patient-reported data; providing context to providers for patient-reported data (selected domains/measures)
Jan	Standards for data feeds; exact question; responses offered (selected domains/measures)
Feb	Standards and processes for assessing accuracy and completeness of data; can and should patient reported data be cross-validated with other available data: documenting and communicating condition of data and boundaries of use with end users (selected domains/measures)
Mar	Focused session on technical issues for selected domains/measures
Apr	Vet recommendations for scalable processes for selected measures/domains; check applicability of recommendations to sensitive populations (mental health, substance abuse; HIV status, etc.)
May	Helping stakeholders use data; making data actionable
June	Emerging technologies; modalities for collecting patient-reported data; personal health records; applications with patient-reported feedback to providers
July	Emerging technologies; modalities for collecting patient-reported data; personal health records; applications with patient-reported feedback to providers (continued)
Aug	Related Players & Initiatives/Future State
Sept	Final Vetting of Recommendations
Oct	Loose ends and Wrap Up
Nov	Contingency
